

# Doorsets

Swift Horsman installs over 5000 doorsets each year and has developed both products and processes to improve efficiency and finish quality; Poddoor™ is our latest innovation.

- A unique system developed to simplify the installation of doorsets in dry-wall partitions
- Designed to eliminate inefficiencies associated with poor dimensional tolerances and out of sequence working
- Developed to minimise the time spent on installation, whilst maximising the quality of the end result
- Engineered to work with both metal and timber doorsets
- Comprehensively tested for fire performance, slam and soft body impact to demonstrate compliance with British Standards
- Perfectly placed to provide the robust solution demanded by the rigours of the education environment
- Uniquely offered with Supply & Train™ option to facilitate local labour engagement

PODDOOR™
